COMPARE PANEL FEATURES

The adjacent chart allows you to compare the various features, options and benefits of different standing seam metal panel systems. Select the seam height, panel width, options, locking system, gauge and engineering suited best for your job.

CLASSIC STYLING

Standing Seam metal roofing is one of the oldest and most practical roofing solutions. It's classic look enhances the roofline of virtually all architecture styles. It produces dramatic shadow lines that run continuously from ridge to eave accenting the pitch and plane of every roof angle. Panels may be roll formed at your jobsite or in our factories.

LAST-TIME® DURABILITY

The CB-150 is available in over 30 colors featuring TITAN® COOL ROOF Reflective paint system. This system offers an incredible 35 year no fade warranty*.

TITAN® COOL ROOF

Our reflective paint features BASF® and KYNAR 500® reflective pigmentation technology to deliver highly efficient cooling performance. Testing data supports reflectivity of up to 60% of the heat from the sun and energy savings of up to 20%. Now you can have darker roof colors and still enjoy energy savings.
